# MANAGED ENDPOINT DEFENSE

Strengthen Defenses, Accelerate Detection and Response

As digital initiatives expand organizations' infrastructures, endpoints continue to grow in number and type – including OT, IoT, cloud, and remote user devices such as smartphones and tablets. But endpoints are primary attack vehicles, and all too often, companies are unaware of the cyber risks that endpoints present, particularly from unmanaged devices connecting to their networks or accessing business resources. Without vigilant and continuous oversight of these devices, risk and compliance are difficult to address.

With the new norm of a remote workforce, staffing challenges, and ever-increasing threat vectors on edge devices, companies need help managing the security of their endpoints. Not all vendors are created equal, and having a long list of suggested fixes just adds to your workload. You need the right expert partner to protect an organization and mitigate overall risk – one that fully alleviates the burden of defensive security.

ENSURE ENDPOINTS ARE SECURED

Reveald Managed Endpoint Defense is a core component of Reveald Managed Defense and delivers customized management and support tied back to business and real-world outcomes.

Reveald Managed Endpoint Defense combines our senior-level security professionals with leading technology to provide continuous, proactive management and optimization of endpoint security for devices across your environment. In the process, we round out and lighten the load for lean security teams.

If an aggressive attacker breaks through your defenses, Reveald detection and response capabilities quickly contain threats before they can do damage. But we don't stop there.

Post-containment, our team works backward to trace threats and close open doors along their attack paths. In this way, Reveald uniquely and proactively reduces the attack surface and prevents repeat attacks.

DEFENSIVE MEASURES FOR ENDPOINT EXPOSURE

Access top experts in managed endpoint defense.

Real-time full visibility into endpoint activity across your environment.

Transparent and frictionless endpoint security enables continuous business operations.

Threat containment.

Defensive threat resolution that traces threats backward from containment along the attack paths to close the door to repeat attacks.

PROACTIVE DEFENSE

Reveald Managed Endpoint Defense gives you access to the skills and technology that you need to effectively manage and protect the growing numbers of endpoints across your distributed environment. Get endpoint protection with the flexibility of two levels of service:

Managed Endpoint Defense Base gives you access to our endpoint team of experts who leverage and manage leading endpoint security technologies to proactively defend your endpoints. Includes provisioning and management of agents, support, and reporting.

Managed Endpoint Defense Enhanced goes beyond endpoint protection to include threat hunting, threat containment, and threat resolution. A Remediation Advisor guides you in understanding how to resolve root cause exposures to prevent repeat attacks.

ABOUT REVEALD

Reveald makes Continuous Exposure Management a reality to solve the biggest challenges in cybersecurity. Our trailblazing "offense to defense" approach gives the advantage back to the business. It is the only solution that combines risk hunting, full defensive response, and threat and exposure resolution to deliver business-driven outcomes. Operationalizing cutting-edge technology for exposure management, Reveald uncovers every conceivable attack path and intelligently prioritizes them by business criticality and risk. Our Cyber Fusion Center team of elite security experts then systemically neutralizes those attack paths to make critical IT assets increasingly impervious to exploitation. The addition of ongoing monitoring and advisory services empowers users to adopt a formidable defensive posture while taking pressure off their in-house security resources. Above all, Reveald turns cyber risk into something measurable and manageable from the SOC to the C-Suite.
