

VIRTUAL CISO

(vCISO)

Expertise and guidance,
tailored to your needs.

Reveald has the strategy, expertise, and experience to aid organizations from initial assessment to the ongoing management of a cybersecurity program.

TODAY'S CYBERSECURITY LANDSCAPE PRESENTS A CISO WITH NEW CHALLENGES

There are expectations to understand business goals, quickly identify, and assess associated cyber risks, develop procedural and technological mitigation strategies, communicate effectively to leadership, and be able to implement and manage agile security programs.

Consequently, today's CISOs must be as adept in the Board Room as they are in the Security Operations Center. As a result of the ever-expanding requirements and the continuously widening gap in security expertise at all levels, more and more organizations are looking for established security leadership support from third-party security organizations.

Make better, more informed decisions about the risk that cybersecurity threats pose to an organization.

KEY BENEFITS

Assesses security programs and alignment to the core functions of the business.

Aids in meeting common security standards, frameworks, and compliance regulations.

Helps plan, prioritize, and implement solutions to enable a more secure business.

Implements prevention-first methodologies to help reduce organizational risk.

TIERS OF SERVICE

Reveald provides flexible options to meet both the security and budgetary needs of the organization.

Full-Scale

For organizations that require more dedicated assistance with current security needs, the Reveald Full-Scale vCISO provides an experienced executive security leader that helps plan, prioritize, and implement solutions as well as continually manage risk efficiently to reduce impact to the business using prevention-first methodologies. The role is primarily remote but can be on-site during critical initiatives or on an established cadence.

Half-Scale

Like the Dedicated vCISO, the Half-Scale vCISO is for organizations that require reduced leadership support or those in a transitional phase as a result of a CISO departing the business. The Reveald Half-Scale vCISO provides security functions and ongoing management, allowing the organization to continually function until a full-time CISO can be hired. This role is offered both on-site and remote.

On-Demand

For organizations that are seeking a vCISO to act as a trusted executive level security advisor and provide ad-hoc support to assist organizations that do not require the support of a Full or Half-Scale executive security leader. The Reveald On-Demand vCISO provides guidance and recommendations to address security functions, ongoing management, and assist with contractual security requirements related to business operations.

As a trusted advisor, Reveald offers Virtual CISO (vCISO) Services to assist organizations with meeting these needs. The Reveald vCISOs are proven leaders in assessing security requirements and aligning security programs with the core functions of the business. Operating across all levels of the organization, Reveald experts are well versed in driving improvements in security programs and security operations management to meet the needs of the entire organization. Reveald vCISOs are also specialists in meeting industry security standards and compliance regulations, bringing a wealth of experience to address these ever-increasing requirements.

ABOUT REVEALD

Reveald is making Exposure Management a reality to solve the biggest challenges in cybersecurity with a trailblazing 'offense to defense' approach that gives the advantage back to the business. It is the only solution that combines risk hunting, full defensive response, and threat and exposure remediation services that deliver business-driven outcomes. Operationalizing cutting-edge technology for exposure management, Reveald uncovers every conceivable attack path and intelligently prioritizes them by business criticality and risk. Our Fusion Center team of elite security experts then systemically neutralizes those attack paths to make critical IT assets increasingly impervious to exploitation. The addition of ongoing monitoring and advisory services empowers users to adopt a formidable defensive posture while taking pressure off their in-house security resources. Above all, Reveald turns cyber risk into something measurable and manageable from the SOC to the C-Suite.
